

UNIVERSAL LAUNDRY DETERGENT – concentrated laundry gel designed for professional washing of a wide range of fabrics. Suitable for both white and coloured laundry, it effectively removes stains and dirt even at low temperatures. Active ingredients and enzymes penetrate deep into the fabric fibers, dissolving tough stains and impurities. The innovative formula protects colours from fading and keeps laundry fresh and brilliantly clean.

INSTRUCTIONS FOR USE:

Sorting Laundry:

Sort textiles by color (white, colored, dark) and according to the recommended washing temperatures indicated on the care labels (including 95 °C, which is intended for durable textiles such as towels, bed linens, or kitchen cloths requiring maximum hygiene).

Measuring Detergent:

Use a measuring cup to measure the correct amount of detergent. The amount depends on the level of soiling and the hardness of the water.

Preparing the Washing Machine:

Place the laundry into the drum of the washing machine. Pour the laundry gel into the detergent dispenser or use a dosing ball and place it directly into the drum.

Setting the Washing Machine:

Select the appropriate washing program and set the temperature according to the instructions on the care labels of the textiles (e.g., 30 °C for delicate fabrics, 60 °C for white cotton laundry, 95 °C for textiles requiring intensive cleaning).

Starting the Wash Cycle:

Start the washing machine and let the wash cycle complete.

After Washing Care:

Remove the laundry from the washing machine promptly to avoid dampness. If necessary, use a dryer in accordance with the instructions on the care labels.

Danger:

- Contains: Sulfuric acid, mono-C12-18-alkyl esters, sodium salts.
- H318 Causes serious eye damage.
- P101 If medical advice is needed, have product container or label at hand.
- P102 Keep out of reach of children.
