

LAUNDRY DETERGENT FOR BLACK FABRICS – concentrated laundry detergent with active ingredients and enzymes, effectively removes dirt and stubborn stains. Helps maintain fabric softness and preserves the deep, rich color of textiles even after multiple washes.

INSTRUCTIONS FOR USE:

Sorting Laundry:

Sort fabrics by color (white, colored, dark) and according to the recommended washing temperatures indicated on the care labels (including washing at 95 °C, which is suitable for durable textiles such as towels, bed linens, or kitchen cloths requiring maximum hygiene).

Measuring Detergent:

Use a measuring cup to measure the appropriate amount of detergent. The amount depends on the level of soiling and the hardness of the water.

Preparing the Washing Machine:

Place the laundry into the drum of the washing machine. Pour the laundry gel into the detergent dispenser or use a dosing ball and place it directly in the drum.

Setting the Washing Machine:

Select the appropriate washing program and set the temperature according to the instructions on the fabric care labels (e.g., 30 °C for delicate fabrics, 60 °C for white cotton fabrics, 95 °C for textiles requiring intensive cleaning).

Starting the Wash Cycle:

Start the washing machine and allow the wash cycle to complete.

After Washing Care:

Remove the laundry from the washing machine promptly to prevent dampness. If necessary, use a dryer according to the instructions on the fabric care labels.

Danger:

- Contains: Sulfuric acid, mono-C12-18-alkyl esters, sodium salts.
- H318 Causes serious eye damage.
- P101 If medical advice is needed, have product container or label at hand.
- P102 Keep out of reach of children.

P305+P351+P338 IF IN EYES:

- Rinse cautiously with water for several minutes.
- Remove contact lenses, if present and easy to do.
